Submitted Grant Proposals

1. Congressionally Directed Medical Research Programs

Title. *Effect of Marriage Checkup in Primary Care on Home and Work Health for Active Duty Couples,*
Performance Period: 2022-2025

Role: PI

Percent Effort: 16%

Funding: \$2.5M

Pending Grant Funding

1. Congressionally Directed Medical Research Programs

Title: *“Up-armorizing” at-risk military couples: A stepped approach to early intervention and strengthening of military families.”*

Performance Period: Sep 2021 – Aug 2024

Role: PI

Funding: \$1.2M

Project Goals:

- Adapt a stepped, military couple relationship-skills intervention to fit within an entry-level military training context.
- Evaluate the effectiveness of the military couple relationship-skills intervention in reducing future negative outcomes for at-risk couples compared with provision of usual resources

Current Grant Funding

2. Congressionally Directed Medical Research Programs

Title: *Lesbian, Gay, and Bisexual Couples in the Military: A Post-DADT Examination of Relationship Health, Perceived Community Acceptance, and Mission Readiness.*

Performance Period: 2018-2021

Role: PI

Percent Effort: 15%

Funding: \$1.2M

Project Goals:

- Complete semi-structured phone or video interviews with a sample of Air Force LGB couples and conduct qualitative analyses of interview responses
 - Complete a quantitative survey of a sample of Air Force LGB couples using a broad range of general and LGB-specific measures of community, workplace, relationship, and individual risk and protective factors.
 - Complete a similar quantitative survey of a sample of heterosexual Air Force couples that are matched to the LGB couple on demographic variables.
-

- Develop and test a multi-level, community model of health and functioning for Air Force couples that compares heterosexual and LGB participants and identifies key predictors and mediators of occupational functioning

3. Congressionally Directed Medical Research Programs

Title: *Up-arming' at-risk military couples: A prospective study of committed romantic relationships in transition to their first permanent duty station.*

Performance Period: 2016-2020

Role: PI

Percent Effort: 16%

Funding: \$1M for 3 years

Contract/Grants Officer: Tracie Barrick (USARMY MEDCOM USAMRMC)

Project Goals:

- First-ever prospective study of young military couples in their first assignment in the military.
- Develop, validate mechanism for early identification of couples at risk for negative outcomes at follow-up periods.

Previous Grant Funding

1. Congressionally Directed Medical Research Programs

Title: *Evaluation of a Brief Marriage Intervention for Integrated Behavioral Health Consultants in Primary Care.*

Performance Period: 2015-2020

Role: PI

Percent Effort: 19%

Funding: \$879K for 3 years

Project Goals:

- Conduct a RCT to evaluate the efficacy of Marriage Checkup (MC) in primary care by comparing couples who received MC to couples in a wait list control condition on multiple indices of relationship health.
- Determine the ability of MC to attract military couples across a broad range of relationship functioning by examining standardized measures and other self-report data at baseline.

2. Department of Defense's Psychological Health and Traumatic Brain Injury Research Program

Title: Multidisciplinary Posttraumatic Stress Disorder Research Consortium. *Brief Cognitive Behavioral Treatment of Deployment-Related PTSD in Primary Care Settings: A Randomized Controlled Trial.*

Performance period: 2008-2015

Role: PI (Dr. Alan Peterson, Consortium PI)

Funding: \$25M

Project Goals:

- Determine whether a brief (four 30-minute appointments) CBT protocol designed for use by behavioral health consultants working in primary care would significantly reduce PTSD symptom severity in OIF/OEF/OND veterans in comparison to a minimal contact condition.
- Examine characteristics of patients at pre-treatment, e.g., demographic variables, level of co-morbid depression, that predict a relatively better or worse response to PTSD treatment in primary care.

3. Defense Medical Research and Development Program

Title: *Individual and Relationship Factors Affecting Marriage Quality and Stability Across the Deployment Cycle*

Performance period: 2010-2104

Role: PI

Funding: \$481K

Project Goals:

- Increased understanding of the interactions among extended deployment to combat zone, individual emotional and behavioral health, and marriage and intimate partner relationships
- Results informed the development of specific relationship prevention strategies and products, i.e., behavioral health “up armoring,” both pre- and post-deployment for military members and their intimate partners.

4. Defense Health Program Intramural Award

Title: *Development of a Brief Marriage Intervention for Behavioral Health Consultants (BHC's) in Integrated Primary Care.*

Performance Period: 2012-2014

Role: PI

Funding: \$65K

Project Goals:

- Adapt a brief marital intervention with proven effectiveness in civilian couples for use by BHC's in an Air Force integrated primary care clinic.
- Tailor the content of the intervention to address the unique stressors experienced by military couples.
- Conduct a pilot study of the intervention at two integrated primary care clinics

5. Department of Defense's Peer Reviewed Medical Research Program

Title: *Population Health Trial for Smokeless Tobacco Cessation with Military Personnel*

Performance Period: 2002-2005

Role: Co-Principle Investigator (Herb Severson, Ph.D., Principle Investigator)

Funding: \$2M

Project Goals:

- Provide an empirical evaluation and the cost-effectiveness of combining telephone counseling and a Web-based smokeless tobacco cessation intervention.
