

The American Terrorist: Everything You Need to Know to be a Subject Matter

Expert By Dr. Terry Oroszi and Dr. David Ellis

Readers of “The American Terrorist” will be able to discuss terrorism like an expert. The book explains why some criminals are labeled as terrorists, but others are not, and compiles the attributes of 500+ American citizens charged with acts related to terrorism into an 8-marker profile of an American terrorist. Acts of terrorism may only impact a few, but the fear they invoke permeates the entire country and divides us. This book gives power back to the community to identify a developing terrorist and offers tools to re-engage them back into society and steer them down a better path. The reader will also find a complete list and summaries of domestic and international terrorist organizations with which American terrorists align.

Features:

The Mindset of An American Terrorist is thoroughly examined, including social, marital, and economic class, education, profession, race, gender, sexuality, religion, and the desire for political freedom.

Is Your Neighbor A Terrorist? Determine your state of security based on the citizenship, homeland, and local residence of American terrorists.

The American Female Terrorist is relatively unknown to many citizens. This book answers the primary question many are asking: why would a woman join an organization that renounces many of the rights they enjoy as U.S. citizens?

The American Male Terrorist is well known, or is he? Find out if your assumptions about the age, education, allegiance, marital status, and mental health are correct.

Recognizing a Developing Terrorist: The book reviews historical terrorist profiling and then devises a new, 8-marker profile of a developing terrorist supported by statistics and case studies.

The American Military Terrorist is a terrorist with experience in the U.S. armed forces. One chapter of the book explores the controversial profiles of these terrorists.

Behind Bars is a chapter that documents the official charges (very few terrorists are charged with terrorism), sentences, and prison locations of American terrorists.

And more...

- Terrorism camps, where are they and who attends
- The top targets and weapons used by American terrorists
- FBI involvement
- Prevention strategies and federal policies
- The Terrorist Profile as a preventative tool
- De-radicalization and disengagement
- Federal policies related to terrorism

About the Authors:

Dr. Terry Oroszi is an Assistant Professor at Wright State University and serves as Director of the graduate and the CBRN Defense Programs. Dr. Oroszi shares her time with Wright Patterson Air Force Base where she works as a strategic planner and at the Advanced Technical Intelligence Center teaching terrorism and leadership to intelligence analyst students. She is the founder and chair of the Dayton Think Tank, a recent FBI Citizens Academy graduate, and a regional board member of the InfraGard. Her subject matter expertise in terrorism and crisis leadership has been recognized in media, including print, web, and T.V., and as an invited speaker at national conferences for military, government and industry leaders. Along with several journal publications, she is a co-editor and contributing author of “Weapons of Mass Psychological Destruction and the People that Use Them,” Praeger ABC-Clio, found on the Alibris 2005 – 2015 best-selling list.

Dr. David Ellis is a scientist conducting research in toxicology, neuro-behavior, and human performance at Air Force Research Laboratory. He is also an Adjunct Professor in the Department of Pharmacology & Toxicology, Boonshoft School of Medicine, Wright State University. Dr. Ellis earned a B.S. in Toxicology from Ashland University, an M.S. in Pharmacology and Toxicology and PhD in Biomedical Sciences from Wright State University. He has worked in industry (Kao, Procter & Gamble, HMR Pharmaceuticals, Wil Research), government (U.S. Environmental Protection

Agency HURL, Armstrong Laboratory, Air Force Research Laboratory), and academia (Wright State University), giving him strong scientific expertise. He is also a member of Dayton Infragard, AAAS, and the Ohio Academy of Science. is a research scientist conducting studies in toxicology, human performance, behavior, and cognition from a military perspective.
